

Kano Budget Working Group

REPORT FOR TOWN HALL MEETING ON CITIZENS INPUTS GENERATION INTO KANO STATE PROPOSED 2025 BUDGET CONDUCTED AT FIVE KANO CLUSTERS (RANO, KARAYE, GAYA, BICHI AND KANO CENTRAL)

SATURDAY 12th OCTOBER, 2024

1. Background

The purpose of every government all over the world is to improve the general well-being of the citizenry through effective budget formulation and implementation. In compliance with Kano State Public Financial Management Law, 2020, Kano Budget Working Group (KBWG) in collaboration with Ministry of Planning and Budget organized town hall meeting on citizens inputs generation into Kano state 2025 budget. Specifically, the following are the objectives of the workshop:

- To create awareness among the participants on budget process and its importance
- To catalyze citizens actions on budget monitoring and tracking
- To collate citizens inputs in compliance with Kano State PFM Law 2020

Kano Budget Working Group (KBWG) as an umbrella of CSOs working specifically to improve citizen participation in budget process in collaboration with Ministry of Planning and Budget (MoPB) organizes a town hall consultative meeting with all relevant stakeholders to intimate them on the ongoing preparatory stage of 2025 budget process. The participants which were drawn from 44-LGAs under five clusters (Rano, Karaye, Gaya, Bichi and Kano Central). Forty (40) participants (including traditional leaders, elderly group, youth, women, people with special needs) were selected from the LGAs within each cluster and three representatives of Ministry of Planning and Budget were in each cluster to ensure seamless conduct of the respective townhall meetings. In each cluster the session commenced with self-introduction, opening prayer by a volunteer and followed by welcoming remarks by CBO representative at each cluster. One representative of the ministry of planning of budget in each cluster delivered a goodwill message emphasizing on the importance attached to citizen participation in the budget process through monitoring and following up to relevant government institutions for project implementation. The objectives of the session were clarified by the facilitator attached to each cluster.

2. Technical session

During the technical session, facilitators attached to each cluster made presentation on “Budget Process and its Importance”, where they revisited the concept of budget and discussed elaborately on each of the stages of budget processes and the expected roles to play by the citizens. They also dwell on the importance/rational of citizen participation in budget process especially in the areas of identifying specific projects allocated to their communities, following up for project implementation, tracking the progress and advocating for increase in the budget allocations, adding that if more citizens are following up to budget implementation, it will help government to be cautious in spending and adhering to value for money, equity in resource allocation and inclusive growth and development.

2. Observations

Arising from discussions on the presentations made by the facilitators and populating citizens inputs in the adopted template, participants made the following observations:

- a. There were general and common demands (Inputs) from all the LGAs in the areas such as construction of additional class rooms, upgrade of PHC into maternity. Recruitment of more teachers, health personnel, and employment opportunities, and agricultural inputs;
- b. The participants observed the need for the creation of CSOs Legislative Forum to facilitate tracking of state constituency projects, which would enhance transparency and accountability in budget implementation;
- c. The participants observed the need to inform them about how much of their inputs were captured in the budget of the year under review so as to avoid duplication of projects;
- d. The participants equally observed that they should be inform timely about the townhall meeting so as to prepare their submissions in earnest; and
- e. It was observed that lack of public enlightenment on budget process inhibits transparency and accountability in its implementation.

Lessons Learnt

Community members at grass root are keenly interested to participate in budget processes. If all hands will be on deck, the society will develop to its full potentials

Closing Remarks

The sessions at the five designated clusters came to an end with remarks by the participants including traditional leaders and labour unions. Questions asked were answered accordingly and recommendations were received and will later be put into action where possible.
